## 1.3 Annual Review of Phosphate Resources

In October 2013 the Company reported an upgraded Phosphate Resource for the Cabinda Project in Angola (refer ASX announcement dated 16 October 2013). As a result of the annual review of the Company's Phosphate Resources there has been no change to the Phosphate Resources reported since 16 October 2013.

## 1.4 Governance of Phosphate Resources

The Company engages external consultants and competent persons (as required by the JORC code) to prepare and calculate estimates of its Phosphate Resources. These estimates and underlying assumptions are reviewed by the Board and Management for reasonableness and accuracy. The results of the Phosphate Resource estimates are then reported in accordance with the JORC codes and other applicable rules.

Where material changes occur during the year to a project, including project's size, title or exploration results or other technical information, then previous resource estimates and market disclosures are reviewed for completeness.

The Company reviews its Phosphate Resources as at 30 June each year. Where a material change has occurred in the assumptions or data used in previously reported Phosphate Resources, a revised resource estimate will be prepared as part of the Annual review process.

## About Minbos

Minbos Resources Limited (**ASX:MNB**) is an ASX-listed exploration and development company focused on phosphate ore within the Cabinda Province of Angola and the adjoining areas of the far western DRC. Through its subsidiaries and joint ventures, the Company is exploring over 400,000ha of highly prospective ground hosting phosphate ore.

Minbos is focussing on the development of the high grade Cacata project in Cabinda whilst growing its current resource base in incremental stages on the remaining deposits in Angola.

The Company's strategy is to specifically target the exploration and development of low cost fertiliser-based commodities in order to tap into the growing global demand for fertilisers. Phosphate is an essential component in certain agricultural fertilisers, with the market supported by the increasing global demand for food and bio-fuel products.
